## About

Gardenstore is a unique way to store garden equipment and tools safely because of its unique design can be used almost anywhere

Gardenstore's steel construction is tough but lightweight and because of its flat-pack construction is man portable.

Lightweight Components allow Gardenstore's to be used in hard to access backyards or gardens

## Features & Improvements

Stainless Steel hinges improve security and appearance - Door & Frame have increased steel thickness

Stronger Construction - constructed from high quality galvanised steel panels for greater strength and durability

Edges on the roof replaced with specially designed die cast aluminium corners - Improves appearance, strength, durability, and protects the corners from knocks and potential damage whilst in use

**Alternativley to the static garden shed, Gardenstore's are secure, robust construction but light enough to be man portable, will fit in even the most inaccessible areas and is quick and easy to assemble.**

## Qualities Of Gardenstore's

**Secure** - Robust Steel construction with double locking system

**Portable** - Light enough to be carried to the most inaccessible places

**Simple** - No specialist tools needed just a simple socket set is all you will need

**Quick** - Once the components are in place just takes 40 minutes to construct

**Adaptable** - Easily returned to flat-pack form for use elsewhere

**Flexible** - A wide range of accessories available for personalised storage solutions

**Ideal for all sizes of garden and the perfect way to securely store your garden equipment**
